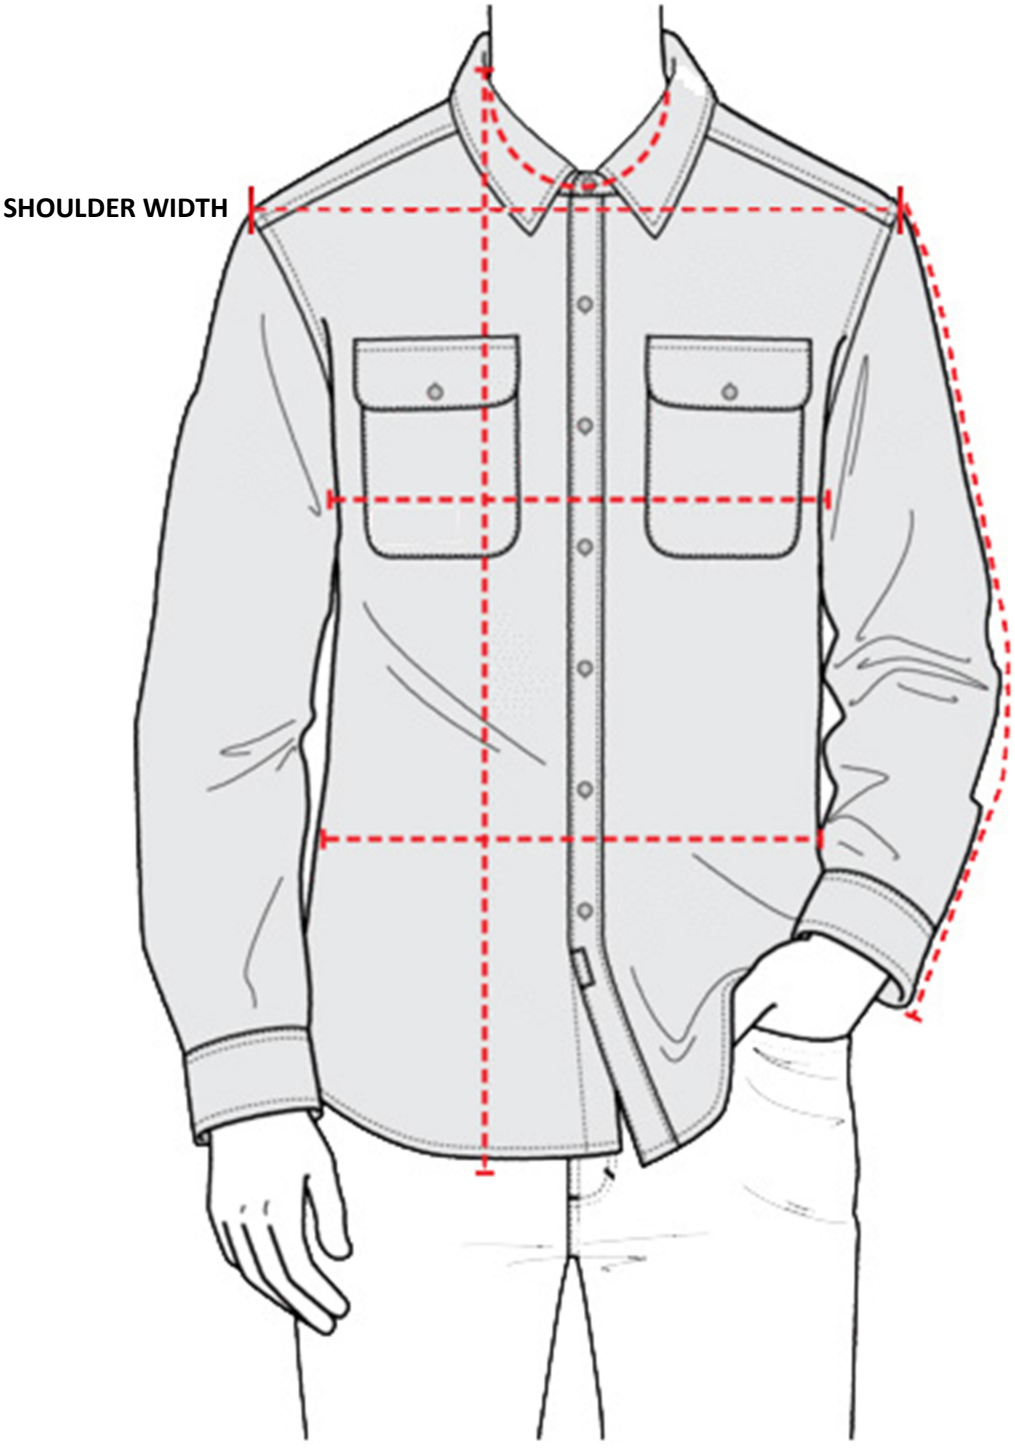
SHOULDER WIDTH

Measure across the back from outer shoulder bone to outer shoulder bone. When measuring, visually estimate where shoulder seam ideally should be which is at the outer edge of the shoulder. Check size chart for standard reference of your usual size.

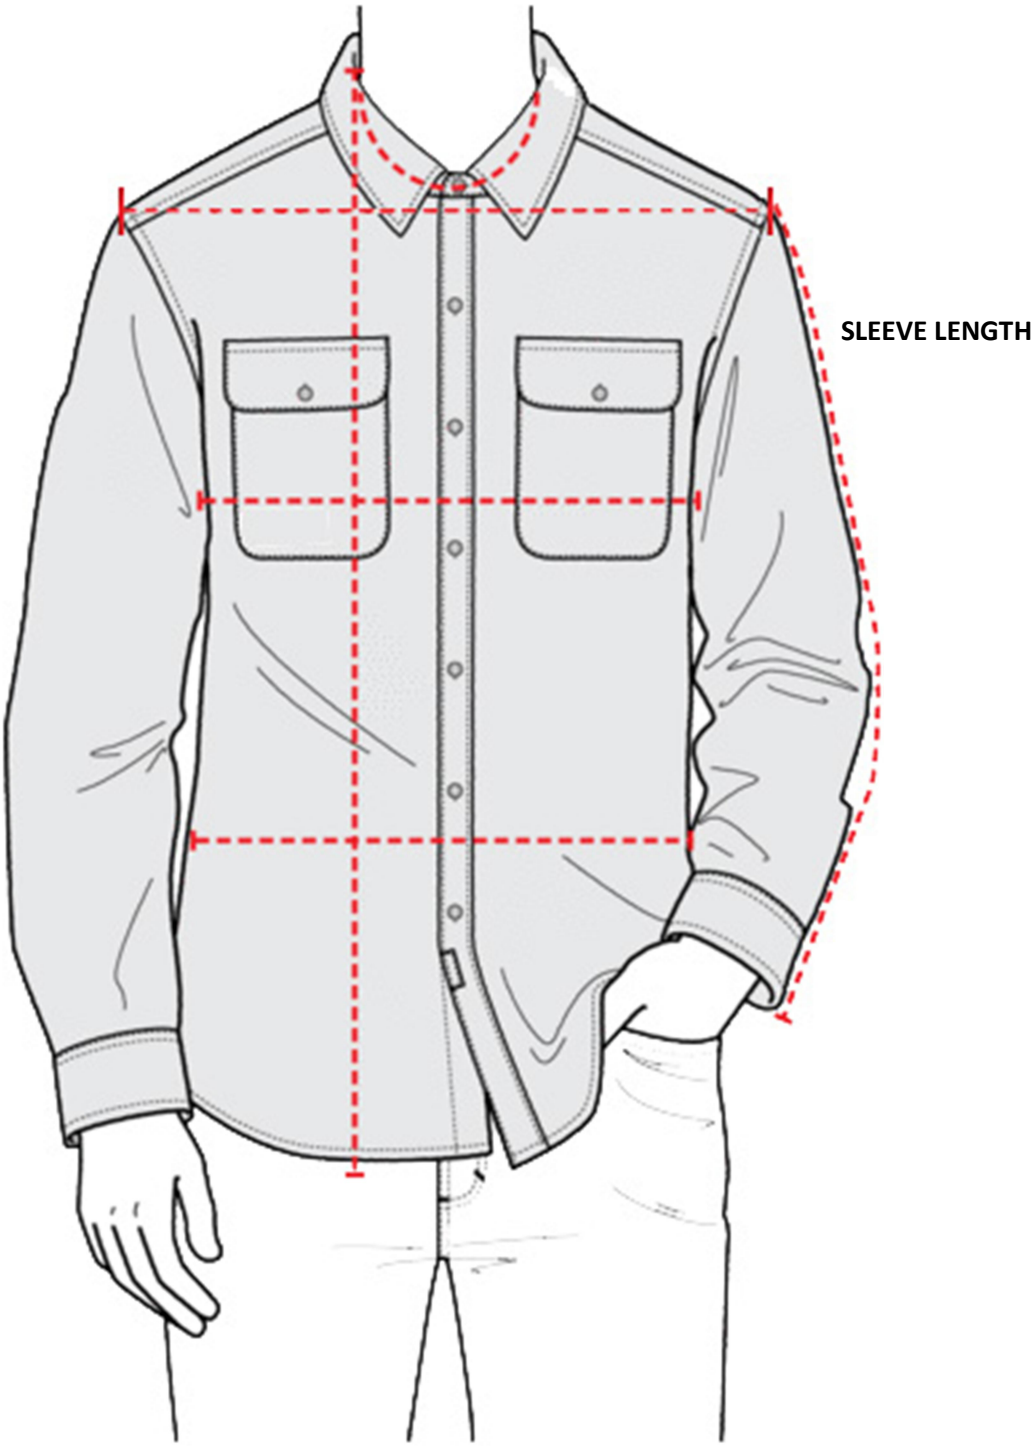
Alternately a well-fitting button up shirt can be used: With shirt buttoned, lay it flat on a table. Measure straight across the shoulder line from top of seam to top of seam.



SLEEVE LENGTH

Measure from top of arm at shoulder bone to just below wrist bone with arm slightly bent as imaged. Check size chart for standard reference of your usual size.

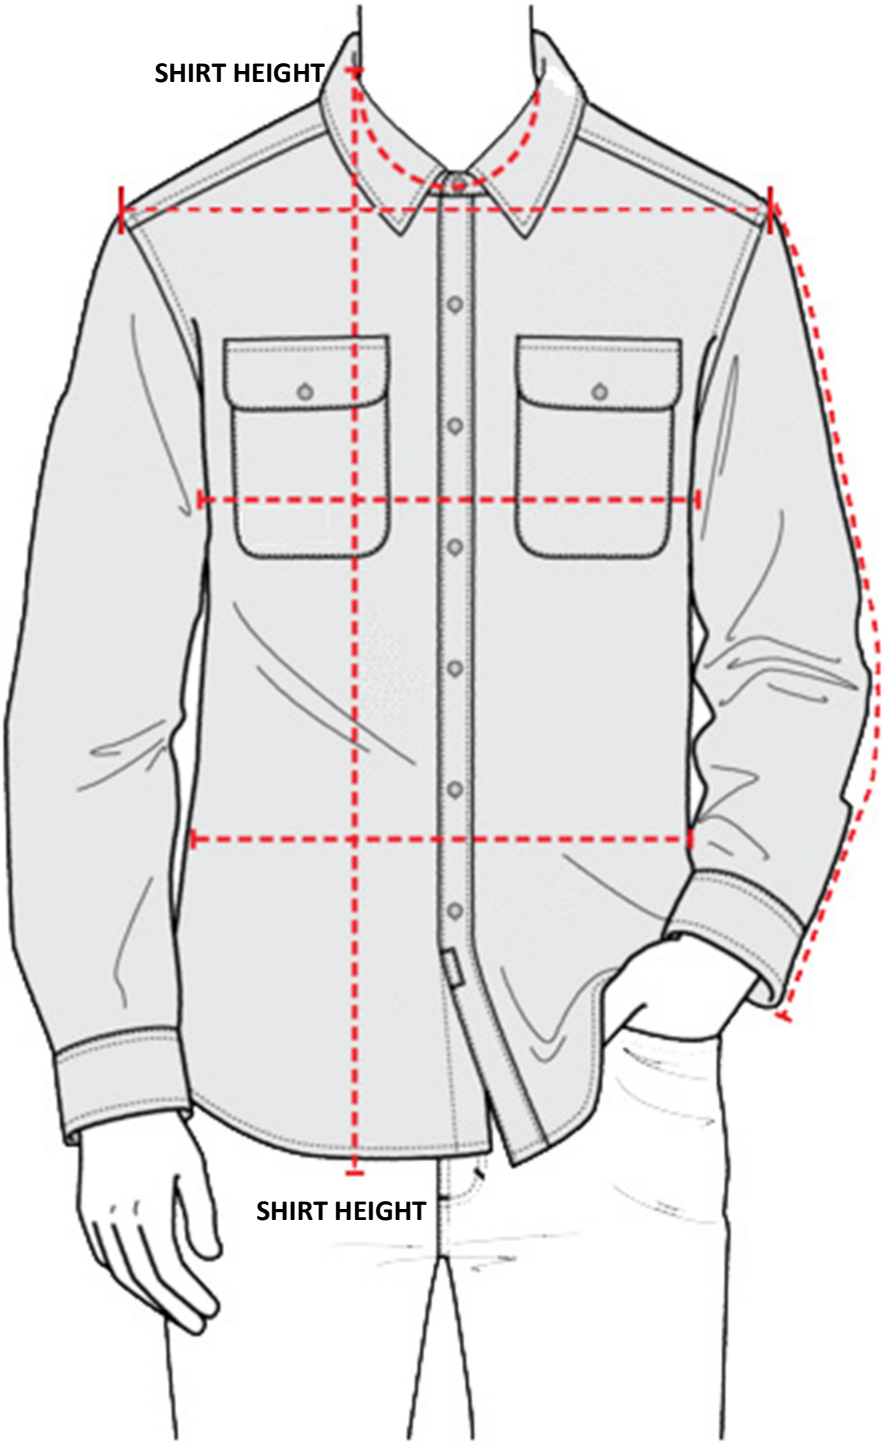
MISTAKE NOTE: *99% of the mistakes happen with sleeves being measured too SHORT rather than too long.*



SHIRT HEIGHT (OR LENGTH)

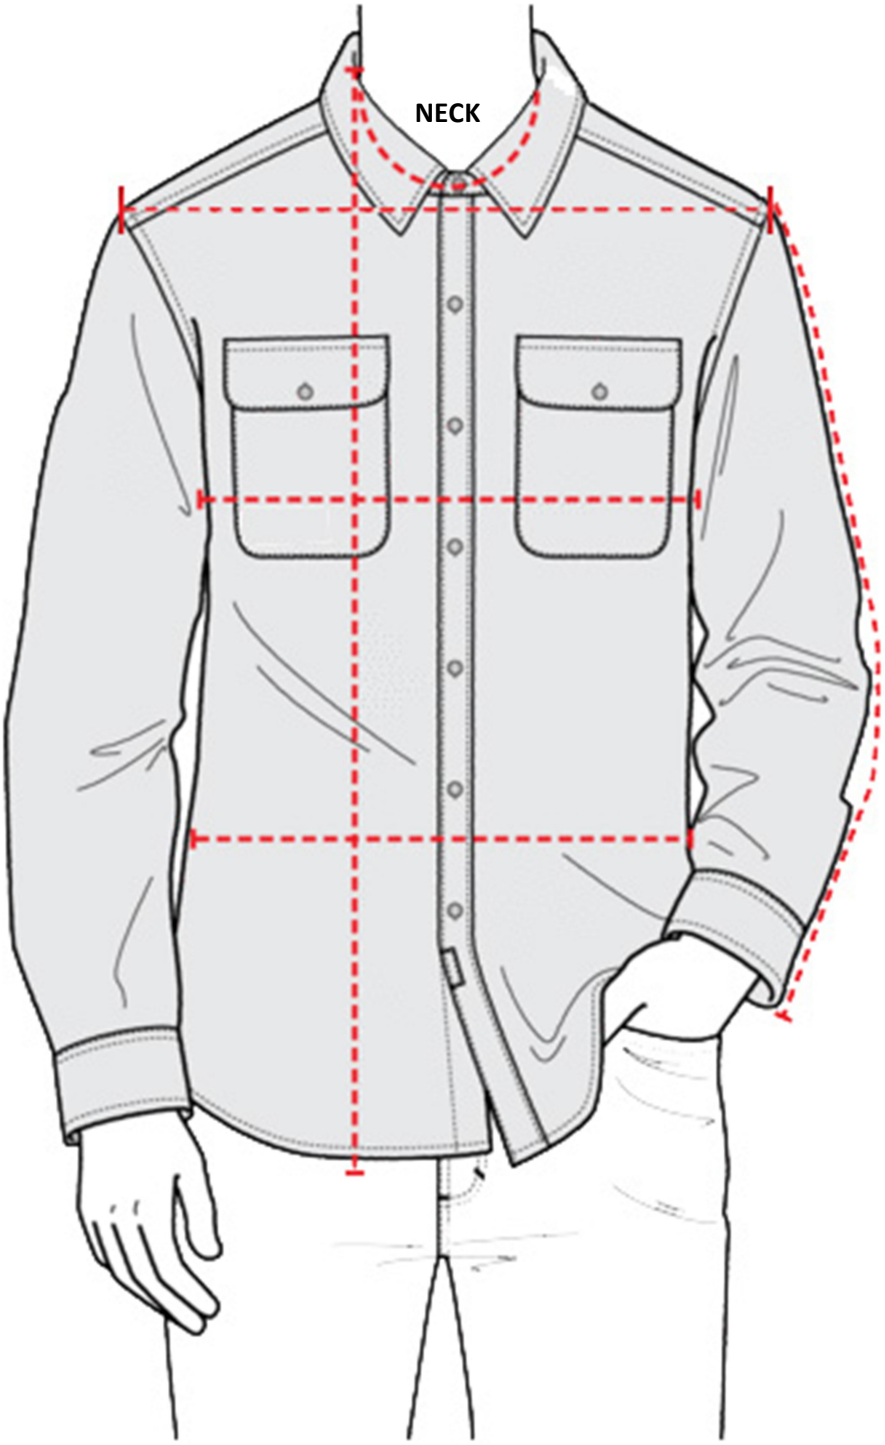
Measure from the middle of your Adams Apple to the bottom of your zipper. Check size chart for standard reference of your usual size. MISTAKE NOTE: *99% of the mistakes happen with shirt height being measured too SHORT rather than too long.*

Alternately, a well-fitting shirt can be used. With shirt on, mark desired length with a piece of tape. Take shirt off and lay flat on a table - measure from the top of shoulder to the tape.



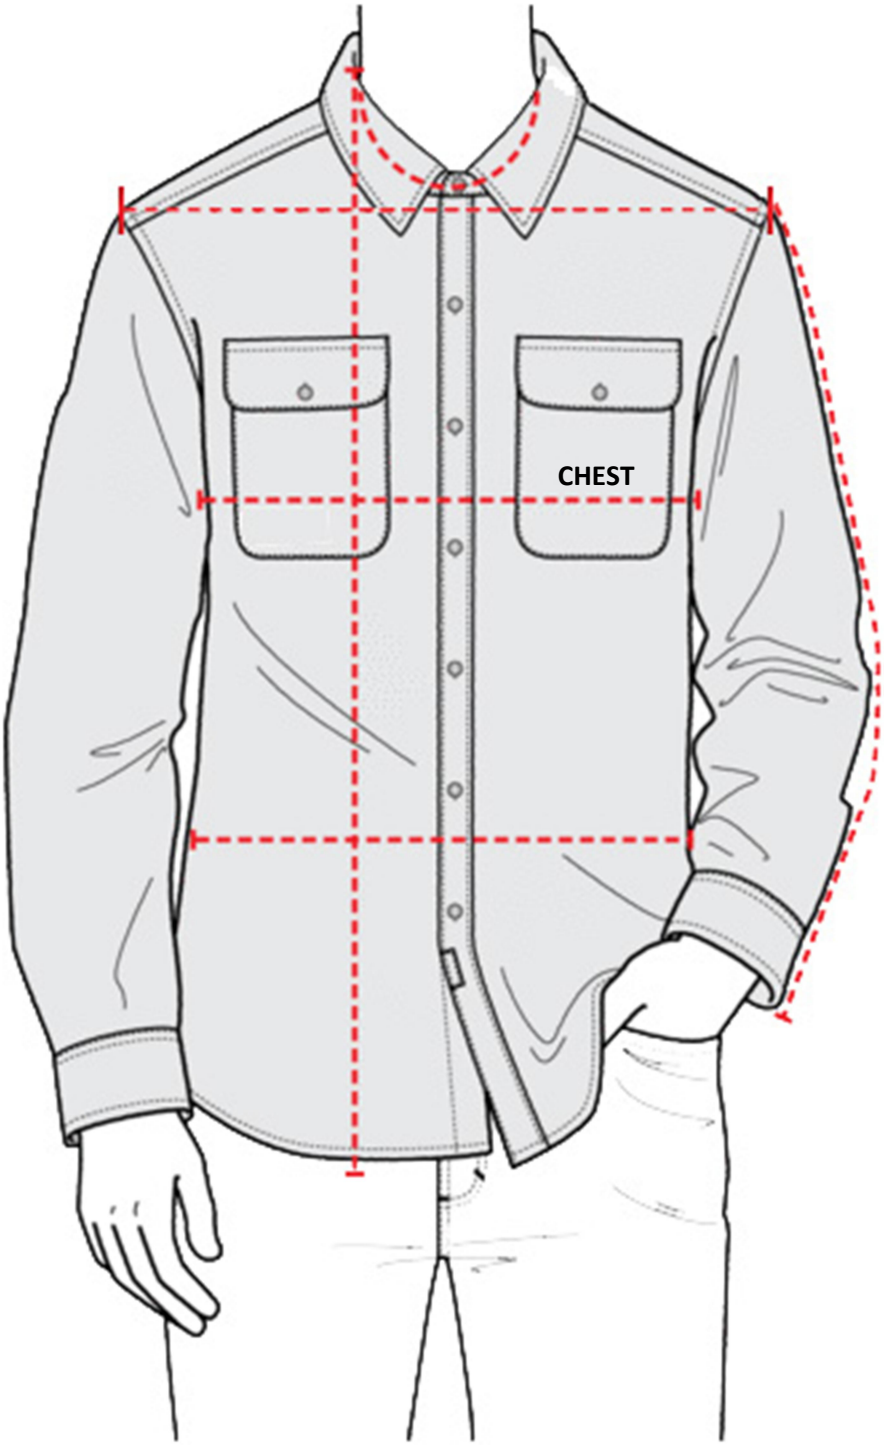
NECK CIRCUMFERENCE

Holding the tape comfortably (not too tight), measure the full circumference of your neck at the Adams Apple.



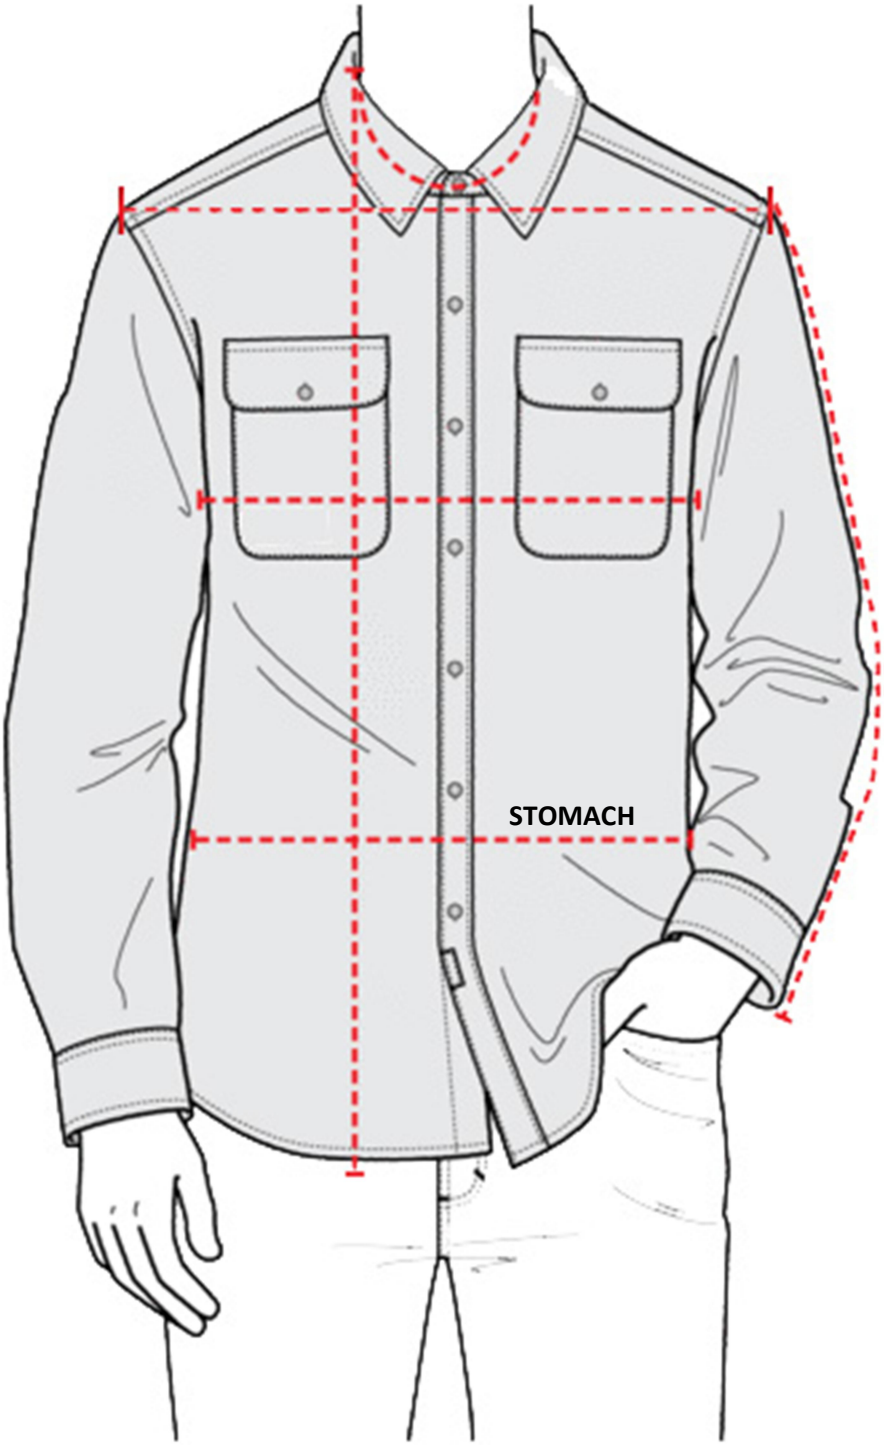
CHEST CIRCUMFERENCE

Holding the tape comfortably (not too tight), measure the full circumference of the largest part your chest. Usually it is approx. 1-2” below the armpits.



STOMACH CIRCUMFERENCE

Holding the tape comfortably (not too tight), measure the full circumference of your stomach at the belly button.



HIP / SEAT MEASUREMENT

With tape comfortable, measure all the way around the largest part of your hip and where a visual estimation of the lower and desired part of your shirt will drape.

BICEP MEASUREMENT:

If you have larger than average biceps, measure around the largest part of the bicep.

NOTES FOR ADDITIONAL INFO AND MEASUREMENTS:

Use the notes section to place any additional information you want us to know. Also use it to add any additional measurements for disproportionate areas of your body, but where our fields don't exist.

For example; If you have larger than average wrists, you would measure around the wrist at the wrist bone and put "Cuff: {your measurement}" in notes area (without quotes or parenthesis).

Contact customerservice@weddingtropics.com if you need help on "how to" on any areas not covered in this document.
